

▶ SYSTEM HYGIENICS LAUNCHES NEW WEBSITE

System Hygienics, the UK's leading air hygiene specialist, has launched its new website complete with a brand new strapline: clean air is our business.

Darren Ling, Sales Director for System Hygienics, commented: "Our old website was starting to look a little tired, so we have gone for a fresh new look that highlights to our customers the full range of cleaning services we provide." New features include: Services pages which allow customers to explore System Hygienics' full range of services including, ventilation duct cleaning; kitchen extract duct cleaning, infection control in hospitals, cleanliness risk surveys, fire damper testing, rubbish chute cleaning, marine industry cleaning and industrial cleaning; News and media displaying recent media coverage and newsletters; a Case study section highlighting service specific case studies and a new navigation system to help visitors find things quickly and efficiently.

▶ NOISE CONTROL AT BOVINGTON TANK MUSEUM

Zehnder, Europe's leading manufacturer of radiant ceiling panels is very proud to be involved in the £16 million, Heritage Lottery Funded, redevelopment of the Bovington Tank Museum in Dorset. The two key considerations were firstly the preservation of the unique collection of tanks and secondly the acoustics of the display hall. King Shaw Associates selected the Zehnder Flatline radiant heating panel because of its unmatched performance on both accounts.

▶ TORK LAUNCHES FIRST EVER ONE-STOP SHOP CATALOGUE

Tork manufacturer SCA Tissue Europe has compiled a complete catalogue covering the entire UK product range for the first time ever. Distributors and customers can now access a comprehensive brochure featuring all Tork solutions for washrooms, industry, horeca and healthcare. The 68-page, full-colour A4 publication features the entire product range with environmental information and details of latest product launches. It will be updated around every six months.

▼ ENERGY SAVING IN PRINT

A simple change of lamps from 400W to 350W metal halide lamps from Venture Lighting Europe has reduced energy consumption and maintenance costs for Howitt, the UK's largest integrated marketing support and print providers. Howitt's Engineering Manager ran a cost saving exercise to achieve energy savings, which showed the T5 system neither provided the necessary lux levels required nor matched the energy savings from Venture's Uni-Form® Pulse Start 350W lamps.
